

Heidelberg Joint Astronomical Colloquium

Winter term 2009/10

Tuesdays, 17:15

Großer Hörsaal, Physikalisches Institut, Philosophenweg 12

Video live streaming available at
evo.caltech.edu

- 20 Oct 09** Tom Abel (Stanford): *Formation of the first stars*
- 27 Oct 09** Isobel Hook (Oxford): *The European Extremely Large Telescope*
- 03 Nov 09** Hendrik Schatz (Michigan State): *Rare isotopes in cosmic explosions and in accelerators on Earth*
- 10 Nov 09** Knud Jahnke (MPIA): *Co-evolution of galaxies and black holes*
- 17 Nov 09** Steen Hansen (Copenhagen): *Why cosmological Dark Matter structures look the way they do*
- 24 Nov 09** Mike Gladders (Chicago): *Bright arcs around optically selected clusters: from a handful to hundreds*
- 01 Dec 09** Kandaswamy Subramanian (Pune): *Magnetic fields in the early Universe*
- 08 Dec 09** Cristina Chiappini (Geneva & INAF-Trieste): *Chemical enrichment of the Milky Way: a local benchmark to cosmology*
- 15 Dec 09** Olaf Reimer (Innsbruck): *Fermi's first year in orbit*
- 22 Dec 09** Klaus Hübner (Heidelberg): *Der 150. Geburtstag der Astrophysik durch Kirchhoffs Spektroskopie der Sonne*
- 12 Jan 10** Rodrigo Ibata (Strasbourg): *Galactic archaeology: the great dig in the sky*
- 19 Jan 10** Lucio Mayer (ETH Zürich): *Galaxy formation*
- 26 Jan 10** Saleem Zaroubi (Groningen): *Probing the epoch of re-ionization with LOFAR*
- 02 Feb 10** Richard Davies (MPE): *Star formation in the central regions of AGN*
